CDC Updates and Shortens Recommended Isolation and Quarantine Period for General Population

Given what we currently know about COVID-19 and the Omicron variant, CDC is shortening the recommended time for isolation for the public. People with COVID-19 should isolate for 5 days and if they are asymptomatic or their symptoms are resolving (without fever for 24 hours), follow that by 5 days of wearing a mask when around others to minimize the risk

of infecting people they encounter. The change is motivated by science demonstrating that the majority of SARS-CoV-2 transmission occurs early in the course of illness, generally in the 1-2 days prior to onset of symptoms and the 2-3 days after.

Additionally, CDC is updating the recommended quarantine period for anyone in the general public who is exposed to COVID-19. For

people who are unvaccinated or are more than six months out from their second mRNA dose (or more than 2 months after the J&J vaccine) and not yet boosted, CDC now recommends quarantine for 5 days followed by strict mask use for an additional 5 days. Alternatively, if a 5-day quarantine is not feasible, it is imperative that an ex-

Cpl Z Frye and Deputy were staging in the area of the 76 and when Cpl Frye made contact with the vehicle operating at 11mph in a 45mph zone and failing to maintain it's lane. CDC

posed person wear a well-fitting mask at all times when around others for 10 days after exposure. Individuals who have received their booster shot do not need to quarantine following an exposure, but should wear a mask for 10 days after the exposure. For all those exposed, best practice would also include a test for SARS-CoV-2 at day 5 after exposure. If symptoms occur, individuals should immediately quarantine until a negative test confirms symptoms are not attributable to COVID-19.

Isolation relates to behavior after a confirmed infection. Isolation for 5 days followed by wearing a well-fitting mask will minimize the risk of spreading the virus to others. Quarantine refers to the time following exposure to the virus or close contact with someone known to have COVID-19. Both updates come as the Omicron variant continues to spread throughout the U.S. and reflects the current science on when and for how long a person is maximally infectious. These recommen-

dations do not supersede state, local, tribal, or territorial laws, rules, and regulations, nor do they apply to healthcare workers for whom CDC has updated guidance.

Data from South Africa and the United Kingdom demonstrate that vaccine effectiveness against infection for two doses of an mRNA vaccine is approximately 35%. A COVID-19 vaccine booster dose restores vaccine effectiveness against infection to 75%. COVID-19 vaccination decreases the risk of severe disease, hospitalization, and death from COVID-19. CDC strongly encourages COVID-19 vaccination for everyone 5 and older and boosters for everyone 16 and older. Vaccination is the best way to protect yourself and reduce the impact of COVID-19 on our communities.

The following is attributable to CDC Director, Dr. Rochelle Walensky:

“The Omicron variant is spreading quickly and has the potential to impact all facets of our society. CDC’s updated recommendations for isolation

and quarantine balance what we know about the spread of the virus and the protection provided by vaccination and booster doses. These updates ensure people can safely continue their daily lives. Prevention is our best option: get vaccinated, get boosted, wear a mask in public indoor settings in areas of substantial and high community transmission, and take a test before you gather.”

Meth

Kimberly Walkney, 45, Dayflower Road Knoxville, was charged with Mfg/Del/Sale or Poss. Of Meth.

Deputy Rodriguez LCSO, observed a white Hyundai Santa Fe passing me on Highway 444 Northbound. When the vehicle passed him it slowed down significantly. Deputy got behind the vehicle and it ran off into the right shoulder and was swerving within its lane it also was traveling 40 mph in a 50 mph zone. Deputy conducted a traffic stop on the vehicle on Highway 321 at Jackson Ferry Road using my emergency equipment for suspicion of a possible drunk driver with the given indicators. Deputy made contact with Kimber Walkney, driver/arrestee, who was acting really nervous. Deputy asked Ms.

Walkney if he can search her vehicle for any illegal narcotics to which she gave him permission. During my search Deputy located a black and pink bag with 1.1 g of meth in it in Ms. Walkney's brown purse along with a orange meth pipe. Deputy placed Ms. Walkney in custody for possession of meth (T.C.A 39-17-434). This occurred in Loudon County, TN.

Horoscopes

you to take care of some projects of your own that you've been putting off. They might be tedious and rather boring, but think how good you'll feel when they're finally done! In the evening you might entertain some visitors. Enjoy your day.

Aquarius 1/20-2/18

Someone close to you might not be feeling very well, Aquarius, and you might feel the need to remain nearby and take care of this person. By all means do this. However, bear in mind that your empathic abilities are operating at a very high level today, and therefore you could actually experience some of their discomfort. Be sure to protect yourself psychically by keeping the white light around you if you want to avoid feeling ill yourself.

Pisces 2/19-3/20

A goal that you may have been working toward for a long time might still seem very distant right now, Pisces. Therefore, today you could actually find yourself giving up on it. This doesn't imply that what you want will never happen. In fact, sometimes letting go of a dream is a necessary cause of its materialization. Know that this when you start to feel that you're out of sync or in far worse than happiness.

Taurus 4/20-5/20

A member of your household may be having troubles, Aries, and therefore you might consider staying home from work in order to help them get through it all. Nonetheless, you have career responsibilities that you need to fulfill. Whether to stay home or go to work may be a difficult decision to make today, but be sure you weigh all possible factors. Probably your housemate will insist that all is well and send you to work.

Gemini 5/21-6/20

A trip that you wanted to take may have to be postponed, Gemini, probably for financial reasons. You'll want to make the journey in the company of someone who's financially strapped right now. This could be disappointing, but remember that this is only a delay. You'll be able to have your vacation at a later date. Don't be afraid to start making the arrangements. By that time, your friend should have the money.

Cancer 6/21-7/22

The need to complete an important task could have you exercising a far higher level of self-control than you're used to, Cancer. Perseverance and determination could dominate your mood, and therefore you could accomplish wonders. However, be sure to take breaks occasionally, and remember to relax from time to time. Above all, don't be so focused on your work that you forget to eat. Your work will only suffer if you neglect your body. Pace yourself!

Leo 7/23-8/22

A business or romantic partner could be in a rather schizoid mood today, Leo. You'll probably spend a lot of time together, and during the course of the day your friend could jump between enthusiasm and gloom. This could drive you crazy, as you

won't know how to respond. All you can do is make sure all attention stays focused on the issues at hand. This changeability should burn out by the end of the day.

Virgo 8/23-9/22

Generally, you tend to be rather ingenious where work is concerned, Virgo, but today you may feel that the fountain of innovation has totally dried up. The creative part of your mind probably won't be able to generate any new ideas whatsoever. Chances are your biorhythms are low, and therefore your mind is working at a slower pace than usual. Concentrate on routine tasks today. By tomorrow your ingenuity should be back on track.

Libra 9/23-10/22

A crisis of values may confront you today, Libra. Someone you care about might need you to do something for them that you don't feel comfortable doing, and this could put you in a tough spot. You probably won't want to do it, but your friend needs your help. Consider every possible contingency before saying yes or no. Reflect on how these deals could affect both you and

your friend. Only in this way can you really be fair.

Scorpio 10/23-11/21

Today you might feel a little gloomy without knowing why, Scorpio, and you could spend a lot of time trying to find a reason. There probably isn't any concrete reason. It's likely that you're simply responding to low biorhythms. This is, therefore, a good day to go for a workout. The way you can get your biorhythms going and feel a lot better by late afternoon. Then you should actually feel like going out and having some fun.

Sagittarius 11/22-12/21

A close friend or love partner you haven't seen for a while could finally make arrangements to see you, Sagittarius. You therefore could spend much of the day in a great mood, looking forward to the encounter ahead. You'll have a lot of fascinating information to share. It might be a good idea, however, to cut your visit a little shorter than you'd like and make arrangements for another meeting. Otherwise, you might get too tired.
